

Want Your Child to Stay Calm & Cooperate? Do-N-Slide(TM) Could Be Your Secret Weapon

PALM BEACH GARDENS, Fla., Nov. 11 /PRNewswire/ -- Having a daily routine is good for your little one ... and for you! Experts agree that daily routines help avoid meltdowns as well as promote language development and independence. Our Kids To Yours has introduced Do-N-Slide(TM), Picture To-Do Lists for children to help with unresolved routines and sequences. This product improves a child's ability to predict transitions, learn a new task and promote feelings of self reliance.

Do-N-Slide(TM) helps parents get through the day too. The product will help save time during daily routines by providing a picture list of chores. The board reduces the need for repetitive reminders, which means less nagging, allowing more time for meaningful conversation and family time.

Children crave independence and a sense of control over their daily lives, and instinctively rebel against requests for compliance with chores or certain activities. Using Do-N-Slide(TM), parents and children can discuss expectations in advance and compile a visual representation of what tasks must be done over a predetermined period.

"In the home, a routine is a sequence of events that makes the family hum," explained Kim Gallo, Speech Language Pathologist and co-founder of Our Kids To Yours (www.do-n-slide.com). "Most children are visual learners -- they excel in recognition and recollection when given the opportunity to visualize activities. Do-N-Slide(TM) provides an immediate explanation of a sequence or task with a picture, thus encouraging a higher rate of participation from your child."

Do-N-Slide(TM) was made for a broad range of age groups irrespective of reading abilities or language development and consists of a visibly eye-catching board with slider partitions that display picture cards depicting an activity such as make bed, water plants, get mail, put clothes in hamper, feed pet, put toys away and more. Conversion picture packs are available for a short time for Potty Training and Toddler's Day. There is a 'To-Do' column on the left side of the board and an 'All Done' column on the right side. The idea is to slide the picture cards from the 'To-Do' side to the 'All Done' side as the child completes each task. These cards are designed to appeal to, and be understood by any child.
